EXPERIENCE

Abhi Microfinance Bank Ltd

July 2026 – Present

Digital Products Intern

Islamabad, Pakistan

- Designed database ERDs and REST API payload specs for a POC of a centralized KYC automation system on an on-premise blockchain, aimed at eliminating redundant identity verification across multiple products requiring KYC.
- Authored system architecture, technical specifications and conducted competitor research and user journey mapping to inform product design.
- Prototyped smart contracts defining data schemas and access-controlled verification workflows for the KYC ledger POC.
- Contributed to AI POC initiatives, including automated voice agents for marketing and loan recovery workflow automation.

Finova Solutions

February 2025 – December 2025

Co-Founder and Head of Strategy

Islamabad, Pakistan

- Directed product strategy and technical roadmap for a founding team of 5, delivering MVP within a 6 month sprint and presenting to 4 tier-1 financial institutions including JazzCash, Easypaisa, Bank of Punjab, and NBP.
- Secured a government sector contract with the Telecom Foundation (Ministry of IT and Telecommunication, Pakistan) and signed an MOU with Advanzatech for service distribution across the MENA region & in active discussions with Sirius Solutions.

Mobilink Microfinance Bank Ltd

July 2024 – August 2024

Digital Banking Intern

Islamabad, Pakistan

- Built and maintained KPI dashboards for a team of 5 in the Digital Banking division; analyzed operational data using Python and Excel to identify process inefficiencies and inform service delivery improvements.

LearnOBots

June 2024 – July 2024

Sponsorship Intern

Islamabad, Pakistan

- Managed end-to-end sponsorship pipeline, drafted commercial proposals, and maintained reporting for 3 or more active corporate partnership conversations.

PROJECTS

KlimaChain | Solidity, Ethers.js, ERC-20, ERC-721, Sepolia Testnet, Tailwind CSS

- Built a full stack dApp using a dual token model (ERC-721 for provenance, ERC-20 for tradable credits) with 3 interconnected smart contracts and 6 core functions including access controlled minting, capacity gated issuance, and a verifiable burn and retirement mechanism. Deployed live on Sepolia Testnet with MetaMask wallet integration via Ethers.js v6.

TakafulGo | React, Node.js, Express, MongoDB, REST APIs

- Designed a parametric insurance platform with policy purchase in under 3 clicks and a REST API pipeline ingesting live third party data feeds (weather API) to trigger automatic claims settlement. Architected 3 insurance products on a Takaful cooperative model aligned with Islamic finance principles and the SECP Insurance Sandbox framework.

MicroVest | SQL, React, Node.js, Express, MongoDB

- Built a full stack portfolio management system processing financial datasets through a multi variable regression model to generate automated buy/sell signals, with role based access control for 3 user types: Admin, Portfolio Manager, and Investor.

Price Forecasting System | C++, Data Structures, Predictive Modeling

- Engineered a C++ engine processing historical time-series financial data using custom Binary Search Trees and Doubly Linked Lists; implemented Linear Regression, Simple Moving Average smoothing, and variance-threshold anomaly detection.

EDUCATION

National University of Computer and Emerging Sciences (FAST NUCES)

August 2023 – June 2027

Bachelor of Financial Technology

Islamabad, Pakistan

SKILLS

Languages and Tools : Python, SQL, C++, JavaScript, Git

Data and Analytics : Power BI, Advanced Excel, Pandas, NumPy, Time Series Analysis, Anomaly Detection

Web Development : MERN Stack (MongoDB, Express, React, Node.js), REST APIs, Tailwind CSS

Machine Learning & AI : TensorFlow, Scikit-Learn, Predictive Modeling (Classification & Regression)
